

Gen 3, PCIe x4 – SFF-8639

- * Unique tool-less fixture design capable of fitting all widths of 2.5" devices up through 15mm
- * User selectable power for both 12v, 5v, 3.3v and 3.3aux.
- * Standard 15 pin SATA power receptacle or 6 pin socket for use with the Quarch Programmable Power Margining/Measurement Module for margining 12v/5v or 3.3v from 0 to nominal + 20% and simultaneous current/voltage measurement on both 12v and 5v rails (sold separately, see QTL1455 datasheet at www.serialcables.com)
- * Multiple test pads for debug
- * Auto-sense motherboard power and DUT power on through QTL1455 circuitry
